

# MatrikonOPC Alarms and Events Server for Real Time Data

## Create custom simple OPC A&E events based on real-time OPC process values.

The MatrikonOPC A&E Server for OPC Real-time Data provides OPC alarm data for any OPC DA (Data Access) server. Now you can create custom simple OPC A&E events based on real-time OPC process values. Create custom event conditions that fire OPC events. Combine custom event sources to specify precise process condition criteria.

Custom data access conditions include:

- Deviation
- Threshold
- Rate of Change
- OPC Quality
- OPC Server Connect
- OPC Server Disconnect
